

Following the announcement on Monday we have reviewed our existing VirtualOutcomes library of courses and our future course plans to map them to the requirements of the new contract and our proposals are below. VirtualOutcomes is committed to supporting LPCs to deliver the future of community pharmacy through workforce development.

Requirement	Course	Latest Release Date
New Pharmacy Contract	Summary course	1 st September
Pharmacy Quality Scheme (replacing QPS)	A module to take pharmacies through the gateway and quality criteria and how to maximise their claim	20 th September
NHS Community Pharmacist Consultation Service	Module to support the implementation and training for this service.	Already live
Accredited Health Champion course	For pharmacies live with VirtualOutcomes £55+VAT, for all others £60+VAT including exam fee	Already live
Sepsis	Course to enable pharmacist to disseminate the CPPE training across the whole pharmacy team	16 th August
Dementia	Use existing Dementia module in the library. Add a short module on how to make the pharmacy a Dementia Friendly Environment. This will include the standards checklist	16 th August
Medicines Safety Audits	Course on how to carry out audits on (Lithium, Valproate and NSAIDs)	1 st September
Diabetes	Support to deliver the foot screening and eye checks service. This will be a short module building on the existing diabetes module currently in the library	20 th September
Pilot services being launched from 1 st October. VirtualOutcomes will have courses available to any LPC taking part in a pilot prior to go live with the pilot. This will support your implementation of the service.		
Hep C Screening	Background, details of service and implementation support	TBC
Point of Care testing (with links to our AMR course)	Background, details of service and implementation support	TBC
Undiagnosed CVD including AF detection	Background, details of service and implementation support	TBC
Stop smoking referrals	Background, details of service and implementation support	TBC

These courses are on top of the courses to support the public health campaigns on Antimicrobial Resistance, Help Us Help You, Stoptober and Alcohol intake. See details on the PSNC website (<https://psnc.org.uk/services-commissioning/essential-services/public-health/>)

From April 2020 VirtualOutcomes will also produce courses on asthma inhaler technique, suicide prevention, palliative care service and medicines reconciliation service, plus any other section of the new pharmacy contract the occur. This will be on top of the courses produced to deliver all mandated public health campaign.
